\* **Additional ecological information:**\* **General notes:**

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water  
 Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Harmful to aquatic organisms

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

## SECTION 13: Disposal considerations

\* **13.1 Waste treatment methods**\* **Recommendation**

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

\* **European waste catalogue**

The EC waste catalog number (EAC) can only be determined after the type of use by the end-user is known for this product.

\* **Uncleaned packaging:**

\* **Recommendation:** Disposal must be made according to official regulations.

\* **Recommended cleansing agents:** Water, if necessary together with cleansing agents.
