**SECTION 8: Exposure controls/personal protection****\* 8.1 Control parameters****\* Ingredients with limit values that require monitoring at the workplace:**

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

**\* Additional information:** The lists valid during the making were used as basis.

**\* 8.2 Exposure controls**

**\* Appropriate engineering controls** No further data; see section 7.

**\* Individual protection measures, such as personal protective equipment****\* General protective and hygienic measures:**

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work.

Avoid contact with the eyes.

**\* Respiratory protection:** Not necessary if room is well-ventilated.

**\* Hand protection**

Preventive skin protection by use of gloves is recommended.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

**\* Material of gloves**

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Suitability (penetration time, material thickness) for a specific workplace should be discussed with the manufacturer of the protective gloves.

**\* Penetration time of glove material**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**\* As protection from splashes gloves made of the following materials are suitable:**

PVC (EN374)

Nitrile rubber: 0.11 mm (EN374)

**\* Eye/face protection**
